DD/R - Organization

18 June 1962

25X1

Future of DD/R. After some discussion of the progress that has not been made in organizing the DD/R, Dr. Scoville said he wondered if the time had not come to ~~make~~ a cause celebre of this matter with the DCI. There was general agreement that the time is now and Dr. Scoville solicited suggestions as to the actual form this issue should take.

18 June 1962 - Geo Miller^{as ESPD} wrote: Gen. Strong's Technical Task Force is the point at which ELINT plans have been evolved, and DD/R representation at this level ~~shown~~ should suffice. Organizationally, it seems DD/R should have the responsibility for chairing as well as staff work for the Task Force, but in view of Gen. Strong's identification with the group, it may be well to continue his chairmanship for the coming year. The functions of this Committee are being studied by General Balmer's group and some changes may be forthcoming as a result of this study.

DD/R - Organization - ELINT

S 18 June 1962

Memo to DD/R from George C. Miller, Ch/ELINT & Spec. Proj.Div./SI

Mr. Miller recommends assignment by OSI of full-time analyst to coordinate mutual interest activities in the ELINT field.

He refers to an ELINT Programs Division of the DD/R, and an ELINT Opns Division of the ELINT Office, DD/R, and outlines areas of interface between DD/R and OSI with regard to requirements, tasking of assets, technical support to collection, feedback from HEPC, evaluation of collection operations, liaison with NSA and with various committees.

S

DD/R 300-62 26 June 1962

Mr. Geo. Miller wrote (re DD/R take-over of ELINT functions):

"Although DD/P, in its various manifestations, will sit astride operational communications channels, it is expected that technical material flow will be relatively unimpeded."

SIGINT Committee of USIB

18 June 1962 - Geo Miller/^{ack/espr}wrote: Since OCI furnishes the CIA SIGINT Committee Member and since the DD/R ELINT Office will maintain ELINT support to the SpINT Staff, it is suggested that OSI in general depend on SPINT as the primarily responsible organization. OSI should rely on SPINT to coordinate with them on committee actions which are of ~~xxxxxx~~ direct OSI concern, although DD/R personnel, of course, would take interest in seeing that this was properly accomplished.

COMOR/COMIREX₄ (Committee on Overhead Reconnaissance)

via ch/ESPD
18 June 1962 - Geo. Miller wrote: COMOR is primarily responsible for special requirements and tasking problems, but since compromises are generally necessary between the desired and the possible (based on equipment and operational limitations), technical advice will be frequently required. The CIA member (from OSI) may be relied upon to consult DD/R when technical problems are involved. DD/R should continue to secure technical assistance from DD/R ELINT components as required.

15 June 1962

Memo for DD/P From Herbert Scoville, Jr. DD(R)
Subject: Transfer of Personnel

After several months of negotiating the precise transfer of personnel of DPD to the DD/R in accordance with [REDACTED] DPD had continued to function as a single unit while awaiting the transfer and this arrangement had created an increasing lack of clarity with regard to policy and command decisions.

25X1

Mr. Scoville wrote: "I believe that it is highly desirable to effect at the earliest possible date a clear cut delineation between the command and policy channels of the two major activities involved. While there can be a mutual interchange of technical assistance, I am convinced that it is highly desirable that both these units begin to operate on their own. To this effect I desire that 18 June 1962 be the date on which separate command channels should be activated. Thus, it is expected that on that date air support activities will report to the DD/P while the redesignated Office of Special Activities will report to the DD/R."
